

FEA Security Services Group (FSSG) establishes operations in Gothenburg

FEA Security Services Group (FSSG) is taking the next step in its long-term development by establishing operations in Gothenburg. The expansion is part of the Group's approved business plan and represents a strategic move to strengthen its presence in Western Sweden, while increasing operational capacity and geographical flexibility.

Gothenburg is a natural market for FSSG. The region is characterised by strong industrial activity, international companies, a growing events and hospitality sector, and increasing demand for professional, secure and quality-assured transport solutions. Through this establishment, FSSG creates improved conditions to work closer to its clients and to meet both current and future needs in a more structured and resilient way.

The initial establishment will be carried out through FEA Executive Advisors, in close collaboration with Inclusion and Freys Hyrverk, with a clear focus on premium and security-driven transport services. Operations will be developed in close dialogue with local partners and regional stakeholders, enabling a controlled and deliberate market entry where delivery capability, quality and cooperation are prioritised from day one.

Operational launch is planned for April 2026. In the short term, activities will be based in central Gothenburg in cooperation with selected partners, with a view toward continued growth and consolidation throughout 2027.

The Gothenburg establishment is a considered and long-term decision. The ambition is to build a stable, scalable and professional operation that complements the Group's existing structure and strengthens delivery reliability over time.

Joakim Raninen, Group CEO, comments on the expansion:

"Gothenburg is a natural next step for FSSG and the companies within the Group. This establishment allows us to work closer to our clients, strengthen our operational capacity, and continue developing safe and professional transport solutions.

We are building this for the long term, with respect for the market, our clients and our colleagues in the industry. Our ambition is not to do the most, but to do things right — with quality, discipline and partnership at the core."

With the establishment in Gothenburg, FSSG continues to develop in line with its business plan and underlying philosophy: combining tradition, responsibility and professionalism with a modern, forward-looking approach.
